28/09/2011

## Symposium II held Aeronautec

Agilis company dedicated to the design and manufacture of aircraft engines, will perform two free lectures aimed at teachers and students of Industrial Maintenance Engineering, Electronics Engineering, Materials Engineering and Industrial Production Engineering.

The talks will cover two main issues as:

- 1) Bearings in Gas Turbines
- 2) Manufacturing Processes, Materials Selection and Seals.

Will be held in the Hall of engineering applications, on Thursday 6 and Friday October 7 from 9:30 am.

With this presentation, the Tecnológico de Costa Rica "seeks to make inroads in areas of high technology from the window of the Air Force toward the design and launch of a new academic offerings in this field," explained the coordinator of the TEC Aeronautics Commission Victor Hernandez Gonzalez.

The event will be invited by the Ministry of Science and Technology, the American Council of Safety of Air Navigation, the Central American Aviation Safety Agency, the Foreign Trade Promoter, Agilis and COOPESA addition to our authorities

Seating is limited, so that there will be a registration process. Please send an email to [vhernandezg@itcr.ac.cr](mailto:vhernandezg@itcr.ac.cr) , [Vihernandezg@gmail.com](mailto:Vihernandezg@gmail.com) .
